CLIENT : Culture Promotion Committee

CONCEPT : 文化推廣委員會的節目種類多不勝數。這設計希望把書版幻化為藝術博物館，使觀眾仿如置身於館內，每翻一頁像是逛著館內的一隅。不同版面介紹著不同的文化節目，令讀者坐著也能感受節目的精采。

MEDIA : Booklet, Promotion Poster & Postcard, Backdrop, Exhibition Panels.

前言 Preface
夕陽西下，華燈初上，來自海洋的空氣一塵不染，暮色裏的香港，燈火璀璨輝煌，城市玲瓏剔透，盡顯大都會的耀目醉人。香港實在是現代文明登峰造極之作。
夜間從人造衛星俯瞰，香港的光亮不是孤立的存在，而是廣佈於珠江口地區的光點群的一個構成部分，顯而易見，香港的繁榮與鄰近地區緊密相連。
從衛星看香港夜景，黑暗之處比光點聚集處面積更廣，揭示了香港的一個秘密。香港雖然以高樓密集聞名，其實離城不遠便是山光水色風情的郊野。這裏山巒環抱着海灣，海灣圍繞着山脈，在山水交錯之間，在藍天白雲的襯托之下，自然的瑰麗秀美，令人心曠神怡。
香港是自然與現代文明緊密拼湊而成的城市，今年月曆的選材讓大家親眼觀察兩者的並存與融和，以鼓勵大家思考城市生活要怎樣調整，才能避免造成氣候變化及視野迷濛，以確保美景常在，天人共存。
香港天文台台長
林超英
City lights come on as the sun sets in the west. Clear pristine air comes in from the ocean. The city of Hong Kong presents itself as an amazing array of brilliant lights encased in clusters of glassy towers. This is a magic moment showing the metropolis of Hong Kong as a mesmerizing sight. Hong Kong is indeed the pearl on the crown of modern civilization.
In night-time satellite images, the lights of Hong Kong are not an isolated existence, but constitute a part of the lights clustering around the Pearl River estuary. The close relationship between the city's prosperity and that of nearby areas is self-evident.
When seen from the satellite, Hong Kong at night shows more area of darkness than that with lights. This reveals a well-guarded secret of Hong Kong. While Hong Kong is famous for closely packed skyscrapers, it has a vast countryside endowed with breathtaking views, just minutes from the city centre. The juxtaposition of hills and bays creates an infinite combination of scenic opportunities. With white clouds dotting the blue sky, all could enjoy a relaxing time on this grand stage of Nature.
Hong Kong is a city where modern civilization meets Nature head on. We invite readers to enjoy seeing with their own eyes the co-existence and integration of these contrasting components in our city. We encourage all to contemplate how we should live our lives in the modern city, to make sure that we would not cause more climate change or more haziness in the sky. Only then would we be able to preserve these beautiful scenes and to ensure the harmonious co-existence of Nature and human beings in the centuries to come.
